### Background Check and Fingerprinting for Adult Learners

**Adult Learner** - a person who arrives at our educational location for a short period of time while registered with Montgomery Montessori Institute. Generally, an Adult Learner might have access to students for instructed observations of the classroom, but this access will be supervised. Supervised access to students occurs when an Adult Learner has proximal contact with students while remaining under the direct observation of a supervision teacher or instructor.

While MMI does not require a formal background check of the Adult Learner, please indicate if you completed this process for your Practicum School
